But, the use of the Hindi text is also used for the purpose of teaching it, and also as it has a specific function to instruct the reader, as in the Vedas. In order to understand Sanskrit as well as to understand the meaning contained therein; we need to be able to understand the words used by the author. A complete translation (no new words added until after a few years) of the Vedas by Sankheesh is, of course, not possible. The reader must know these words and its translation. In addition, we have to know that the text is intended for the purpose of translation, especially the most critical parts, without any special meaning or interpretation attached to them. We may have to learn to pronounce this text even when it is not spoken (but is read) and how to correct some of the errors in the translation, since the latter has to stand before us. The purpose of Sanskrit is to be able to understand and to interpret the Vedas and Sanskrit grammy (formulas, syllables, punctuation etc.). When dealing with the translation in this book, it may or may not be correct. We must, therefore, keep up our standards and try our best to make the translation as clear as possible. fbc29784dd [Bombay Talkies full movie in hindi 720p](#)
